

Advertisements must be paid for in advance. The office is at the corner of Third and Wisconsin streets, Milwaukee, Wis.

**Naval Station at Milwaukee—The Ship Canal—Rock River Rapids—Ship Building—Marine Barracks, &c.**

We desire to impress upon the attention of the General Government the importance of this city as a Naval Station, in connection with the construction of a Ship Canal between Lake Michigan and the Mississippi river. Last week we endeavored to show the decided advantage that the government would experience in establishing that communication through Wisconsin. Many of our arguments in that article added facts that were incontrovertible, and plainly and forcibly preponderated over the Illinois route.

The object of this article is to dwell somewhat more minutely upon the many acknowledged advantages Milwaukee and its vicinity possesses for the establishment of a Naval Station. There seem to be four points on the river, either of which could be made available and converted into a Naval establishment at a comparatively trifling expense.

The dredging at either of these points need not exceed 60,000 cubic yards, which, at 10 cents per yard, would amount to \$6,000. This is intended for 6 feet deep on a basis of 4 feet original water, aggregating nine feet in depth on an area of 6,000 yards. Supposing this basin to be decked on three sides, it will cost for a very good dock \$2 per foot—3300 feet would be \$6,600. This would give the government a basin of sufficient size for all Naval purposes at an expense of only \$12,600. Land can be obtained at any one of these points for a mere nominal sum, sufficient for a Ship Yard, Marine Barracks, Forging establishments, wharves, &c.

The great quantity of excellent ship timber with which our immediate forests abound, is another important consideration, for it can be procured at a much less expense than at Chicago, and with greater facility. There are also Furnaces and Hydraulic machinery in the upper part of the city, where many essential requisites for the establishment of the Naval Station could be procured at a much less expense than abroad.

These four points that we have alluded to, are so situated as to be almost inaccessible to an enemy on every side, without first destroying a greater part of the city, while they at the same time are handily located on the river, and easy of ingress or egress for our own Navy. Another fact we wish to rivet upon the attention of the Government is, that the construction of the ship canal through Wisconsin, and the slack water and side cut improvements on Rock River, will open a channel around the "Rock River Rapids" on the Mississippi, thereby enabling vessels and steamboats of a large class to ascend the Mississippi above that point which they can only do now in times of exceeding high water.

It was our intention to have written more at length on this subject to-day, but circumstances have prevented. We desire much to call the attention of Government to this point as the best on the lake for the establishment of a Naval Station, and also as the most feasible eastern terminus for a ship communication with the Mississippi. We also earnestly wish to enlist the attention of Congress, in that they are to the construction of the ship canal through Wisconsin, and the slack water and side cut improvements on Rock River, will open a channel around the "Rock River Rapids" on the Mississippi, thereby enabling vessels and steamboats of a large class to ascend the Mississippi above that point which they can only do now in times of exceeding high water.

We yesterday received the names of eighty new subscribers in the country to the Weekly Sentinel. This speaks well for the liberality of the people. We are likewise gratified to announce that our Daily is also rapidly increasing in its circulation in the country since the new Postoffice law went into effect.

**NEW PERIODICALS.**

**THE SYRACUSE DAILY JOURNAL** is the name of a very neat little spirited Whig paper just commenced in Syracuse, N. Y., by S. F. SMITH, the able editor of the Western State Journal, in that village. If the Whigs of "Old Onondaga" know what is for their interest, they will abundantly sustain the Daily Journal.

**THE EVENING NEWS**—a very pretty little Daily from Detroit, has just come to hand. It is neutral in politics, and conducted by an association of Printers.

**THE DEMOCRATIC EXPOSITION** and United States Journal, for the country, published at Washington by Dow & Fisk, has been re-modelled into a very neat octavo form, which renders it quite convenient for binding. It is issued weekly at the low price of one dollar per annum.

**MR. HALL** has handed us another No. of Popular Lectures on Science and Art, by Dr. Lardner. The copy before us treats of Galvanism, the Moon and the Weather, Periodic Comets, Radiation of Heat, &c. This work still maintains the high celebrity it has gained for its usefulness and interest.

**ADVOCATE OF PEACE**, a pamphlet issued every other month, at Boston, by the American Peace Society. The principles of peace are well enough in their way, if they could be inculcated without producing a laxity of the National spirit, which is so essentially necessary to the country in great public emergencies. Such are the well known uses of its practical operations. It was this use of "Peace" that prompted the Hartford Convention, and presided over its deliberations—an assembly of men that never can be palliated, and the members of which, it is probable will ever be held in just scorn and contempt by all friends to the country. This policy of "Peace" is part and parcel of the somewhat popular humbug of the day vogue of "non-resistance," and non-resistance, Millerism and Mormonism are synonymous hobbies, on which fanatics ride into public notice, and the lazy and vicious vagabond apes his living out of the industrious community.

The principles of "Peace," as taught at the present day, is but another name for a species of Toryism, or strong attachment to a system that would render our country totally defenceless in the time of foreign aggression, and an easy conquest for a monarchial power. They would dismantle our navy, and let our commerce on the ocean, for the want of protection, dwindle into nothing, and finally be swept from the face of the deep. They would disband our army, and let loose upon the defenceless frontier the "merciless savage," whose well known mode of warfare is an indiscriminate massacre of all ages, sexes and conditions, and they would prostitute the power and military resources of the country at the shrine of their misguided zeal, and all for the impracticable, visionary and dangerous principle of "peace"—principles which, if carried out to their full extent, would eventuate in the destruction of all the means of civilization, and the establishment of a state of barbarism.

plan, which, if carried out to their full extent, would eventuate in the destruction of all the means of civilization, and the establishment of a state of barbarism.

We publicly enter our protest against the spread of such principles. They are the seductive voice of the siren songs which if listened to will sell our fair country to a foreign power. They are the false doctrines, the alluring themes that will in time destroy whatever of national pride and love of country there may be left in the breasts of the American people, and they are the true incentives to National inactivity and National suicide.

The new Post Office law requires that the lists of letters shall be advertised in newspapers that have the largest circulation, without regard to any political considerations. The newly appointed Postmaster in New York sent circulars to the editors of the different daily papers in that city, requiring affidavits of the amount of their circulation, for the purpose of complying with the provisions of the law. The answers to these circulars have elicited the following facts as to the actual number issued from each press:

	Daily.	Weekly.
Courier & Enquirer,	about 4,800	not known.
Journal of Commerce,	" 3,500	about 3,000
Express,	" 3,500	not known.
Tribune,	" 7,000	"
Sun,	14,000	2,000
True Sun,	7,000	not known.
Morning News,	2,000	"
American Republican,	1,000	"
Commercial Advertiser,	3,000	"
Evening Post,	2,500	"
Evening Mirror,	1,500	2,500
Evening Gazette,	1,200	500
Total circulation of the Daily		
City press,	51,000	
With a population of 350,000, this averages nearly one newspaper to every seven persons.		

**MICHIGAN PRESS.**—The Daily News gives the following classified summary of the press in that State:

Democratic papers,	20
Whig,	12
Neutral,	1
Native,	1
Abolition,	1
Presbyterian and Congregational,	2
Baptist,	1
Universalist,	1
Fourierite,	1
Agricultural,	1
Total,	41

**STEAMBOAT ORRISON.**—The following are given as the dimensions and burthen of this new boat, just built on the St. Clair:

Length of keel,	201 feet.
Length of deck,	220 "
Breadth of beam,	31 1/2 "
Extreme breadth,	56 "
Depth of hold,	12 1/2 "
Diameter of paddle wheels,	30 "
Burthen,	800 tons.

The Milwaukee Fleet has had another addition by the launch last week of the new schooner Mary Ann, by Capt. T. Dwyer. The Mary is a fast rigged, neat little craft of 50 tons, with a form of faultless symmetry and proportions, with all the peculiarities of a fleet sailer.

We yesterday received the names of eighty new subscribers in the country to the Weekly Sentinel. This speaks well for the liberality of the people. We are likewise gratified to announce that our Daily is also rapidly increasing in its circulation in the country since the new Postoffice law went into effect.

The great foot race, over the Cambridge Course took place on the 17th ult. The prize was \$500, won as follows:

John Gildersleeve, of N. Y., came in first, taking the purse of 350 dollars.  
Machel Cavanaugh, of Connecticut, came in second, taking the purse of 100 dollars.  
C. Desmond, of Boston, came in third, taking the purse of 50 dollars.  
The time made by the winner of the race for the ten miles, was 57 m. 19 s. being an average of not far from 6 m. per mile.

The Albany Atlas says that a naked sturgeon measuring 8 feet in length, and weighing 230 lbs, leaped into a small boat that was crossing the Hudson, and was taken captive, by a man who was rowing a couple of ladies over the river. The ladies fainted.

**PLAIN FRITTERS.**—Stir a quart of milk gradually into a quart of flour—put in a teaspoonful of salt, and seven beaten eggs. Drop them by the large spoonful into hot lard, and fry till of a light brown color. They are the lightest fried in a great deal of fat, but less greasy if fried in just enough to keep them from sticking. Serve them up with liquid pudding sauce.

"Chatterton" to-morrow.

An hour in our Bookstore to-morrow.

**MR. ENOCH.**—As "A Friend to Merit" wishes to know what became of Mr. Brown and chambermaid, I will gladly hint, by adding another stanza. You seem to be desirous, for me to tell, What did become of Brown, the proprietor of Brown's hotel. Also the chambermaid, that got on the sycamore log. I am happy for to tell you they both got out of the bog.

**SMITH.**  
**QUITE A CHANGE OF OPINION.**—To show what a change has occurred in the prospects of crops in this section, we will mention a single case, which, however, may be an extreme one. A farmer in this county, who, during the late panic, purchased a year's supply of flour at \$5.00 per bushel, now boasts that he will have thirty bushels of wheat to the acre!—[Milwaukee] Tribune.

**MAINE AND RHODE ISLAND.**—A series of resolutions protesting against the manner in which the State of Maine interfered in the State Affairs of Rhode Island was introduced and passed in the Rhode Island House by a vote of 41 to 26. The resolutions were ordered printed with the proceedings of the court that tried Dorr, copies to be sent to Governors of States, and others. The General Assembly adjourned at half past three o'clock on Saturday morning, to meet again in October.

**A QUAKER MARRIAGE.**—A correspondent of the Zion Herald gives the description of a wedding at the Friends' meeting house in New Bedford. The parties were Dr. Benjamin F. Hardy and Miss Sarah Goggleshall.

The hour appointed was eleven in the forenoon. At that hour a large assembly convened within the walls of a plain but somewhat ancient edifice. After the lapse of a few minutes, the bride and bridegroom, attended by their friends and the elders of the church, made their appearance and seated themselves according to the usages of the society. The bride and bridegroom, with the elders of the church, sat on the platform facing the audience, while the friends of the parties sat immediately before them.

The dress of the young couple, though rich, was plain, and their deportment and manner grave, as became the followers of Penn and Fox. I was never so struck with the marriage ceremony in my life before; nor did I see a smile of levity in the whole assembly.

After sitting in silence fifteen or twenty minutes, an aged man probably the leader of the meeting—arose and made a few sensible remarks on the general importance of covenant keeping; after which the bride and bridegroom joined hands, and each in an audible voice promised to be faithful to each other till death should separate them. They then severally signed a printed covenant, on parchment, I believe, after which the covenant was read in the hearing of the meeting. It was read by the venerable Mr. Sherman, the oldest printer of a newspaper in New Bedford.

The audience were now invited to repair to a central part of the house, where a table being placed, the covenant was laid on it, and those who were willing to do so appended their names to it as witnesses. The ceremony of witnessing the covenant was long and somewhat tedious, but nevertheless interesting. The company began to leave the house in silence, before half the names were inserted.

**MYSTERIOUS.**—The brig Porto Rico, of Belfast, known, master, cleared at Philadelphia on the 25th of June, bound for Boston, has to day been towed into this port, found under the following circumstances.

The pilot boat James Avery having on board pilots Mitchell, Hammell Taylor and Harcourt, cruising, fell in with the Porto Rico, on Monday night, about half past 8 o'clock, eighteen miles E. S. E. on Sandy Hook. They hailed her several times, but receiving no answer, manned the yawl and boarded her. They found that she had been abandoned by her crew, who had gone off in the long boat, the chocks of which were on deck. The stern boat was hanging on the davits. The brig was under double-reefed top sails, the fore top-sail lowered. All the clothing and bedding belonging to the captain and crew had been taken away.

The brig was lying to, the helm lashed down to leeward. The captain's compass and the log book were on board. The last entry in the log book was dated June 3d, 5 o'clock A. M.; Fire Island bearing N. N. E. distant 7 miles. The brig was perfectly tight, and had no water in her and was laden with coal. In the run the pilots found a small lamp, as though purposely placed there with the intention of firing the vessel. The remains of the crew's breakfast were found in the galley. When the pilots boarded the Porto Rico they saw a fore-and-aft rigged schooner standing for her; but when the crew saw the pilots board her they bore up and kept out of the way. The pilots brought the brig in, and she was this morning towed up to the city by the steamboat Wave.—[N. Y. Com. Adv.]

**THE TEXAN SENATE CHAMBER.**—The following description of the place where the congregated wisdom of the lone Star Republic holds deliberation, is taken from the correspondence of the Providence Journal. It is rather rich:

"We went in search of the Senate Chamber, which we found some three hundred yards off, over a grocery in a small building rather in the decline of its being, on which no very great expenditure for paint had ever been made. The chamber, 15 by 20 feet, unfinished, though a few gallons of whitewash had apparently been spread by no very practical hands, over the ceiling, was rented for the session at \$3 per week. A flight of steps, which displayed no great expenditure in their construction, nor of artistic skill in ornament ran from the street on the exterior of the building to a platform, from which a door opened into the Senate Chamber, which spared their honors the necessity of entering the august assembly through a dirty dog shop."

**MURDER AT NAUVOO.**—On the 30th ult., Erwin Hodges, brother of William and Stephen Hodges, who were convicted at Burlington, for the murder of Leisi and Miller in Iowa Territory, came to Nauvoo from Burlington, as is said, for the avowed purpose of raising a mob to rescue his brothers. Various reports are afloat, to the effect, that his Mormon associates would not join him, whereupon he made threats that he would turn State's evidence and expose the gang of thieves, robbers, &c., at Nauvoo. On the same night he was found weltering in his blood, and dying—having been wounded in the head by a club and cut in the body by his own bowie knife. When asked who did the deed, he merely replied "a friend from whom he expected better things." As might be expected, this murder has created great excitement in the region about Nauvoo.—[Chicago Jour.]

The Pittsburgh Gazette says that there are over 200,000 bushels of coal ready for market, which cannot be sent in consequence of the Canal interruptions. At least forty boats were, at the last accounts, detained.

**POSTSCRIPT!**

**Asiatic Cholera in New-York!**

Passengers in the boat last evening confirmed the painful rumor of the existence of the Asiatic Cholera in New-York city. There have, up to the last accounts, been 20 cases.

**SCANDAL.**—The Buffalo correspondent of the morning post, says: "Much sensation has been created in this city within a few days past, in consequence of some astounding developments implicating the moral character of a clergyman, who has but recently retired from the pastoral charge of one of our churches. It is alleged that he has carried an amorous correspondence with Mrs. —, a woman of ill repute, but of great personal attractions, and who, since his departure from this city, has been exhibiting his letters. She says she has had him under contribution for two or three years past, to keep silent on the subject. The letters are signed 'L,' one of the initials of the reverend gentleman. Several persons who know his hand-writing, have pronounced the letters genuine."

**A HARD HIT.**—Thomas W. Dorr, in his speech to the multitude assembled to congratulate him on his liberation, is said, by the Providence Journal, to have remarked that he noticed there many honest faces and brawny arms, which it gave him pleasure to see; but he regretted to say he had not seen them on a certain occasion when he required their presence much more than he did then. This was a rebuke well merited by the shuffling cowards who deserted him at the trying moment.

The Donation announced for Rev. Mr. MITCHELL, on Wednesday next, is postponed until further notice.

**DIED.**  
From congestion of the brain, ANNETTA AUGUSTA, infant daughter of John Hustis, Esq.

**SUPPORT HOME MANUFACTURE.**  
MILWAUKEE TOBACCO FACTORY.  
The subscriber would respectfully inform the citizens of Milwaukee and inhabitants of the western world, that he has opened an extensive establishment for the manufacture of Tobacco, Snuff, Cigars, &c., in its various branches, which he pledges himself to be equal to any in the Union. He would modestly insist, that they can get a BETTER article, and have it constantly FRESH, and for the same money, to say nothing of the gratifying reflection of having supported Home Manufacture. Water st. West Ward.

**N. B.**—Prompt and particular attention paid to all orders.
